IPC USING SHARED MEMORY

AIM:

To write a C program to do Inter-Process Communication (IPC) using shared memory between the sender process and the receiver process.

ALGORITHM:

<u>**sender**</u>

1. Set the size of the shared memory segment

2. Allocate the shared memory segment using shmget

3. Attach the shared memory segment using shmat

4. Write a string to the shared memory segment using sprintf

5. Set delay using sleep

6. Detach shared memory segment using shmdt

<u>**receiver**</u>

1. Set the size of the shared memory segment

2116231801161

2. Allocate the shared memory segment using shmget

3. Attach the shared memory segment using shmat

4. Print the shared memory contents sent by the sender process.

5. Detach shared memory segment using shmdt

PROGRAM: SENDER

2116231801161

```c
int main() {

key_t key = ftok("sender.c", 65); int shmid;

SharedMemory *shm;

shmid = shmget(key, sizeof(SharedMemory), 0666 | IPC_CREAT); if (shmid == -1) {

perror("shmget failed"); exit(1);

}

shm = (SharedMemory *)shmat(shmid, NULL, 0); if (shm == (SharedMemory *)-1) {

perror("shmat failed"); exit(1);

}

printf("Sender: Enter a message to send to receiver: "); fgets(shm->message, SHMSIZE, stdin);

shm->message[strcspn(shm->message, "\n")] = '\0';

shm->ready = 1; sleep(5);

if (shmdt(shm) == -1) { perror("shmdt failed"); exit(1);

}

return 0;

}
```
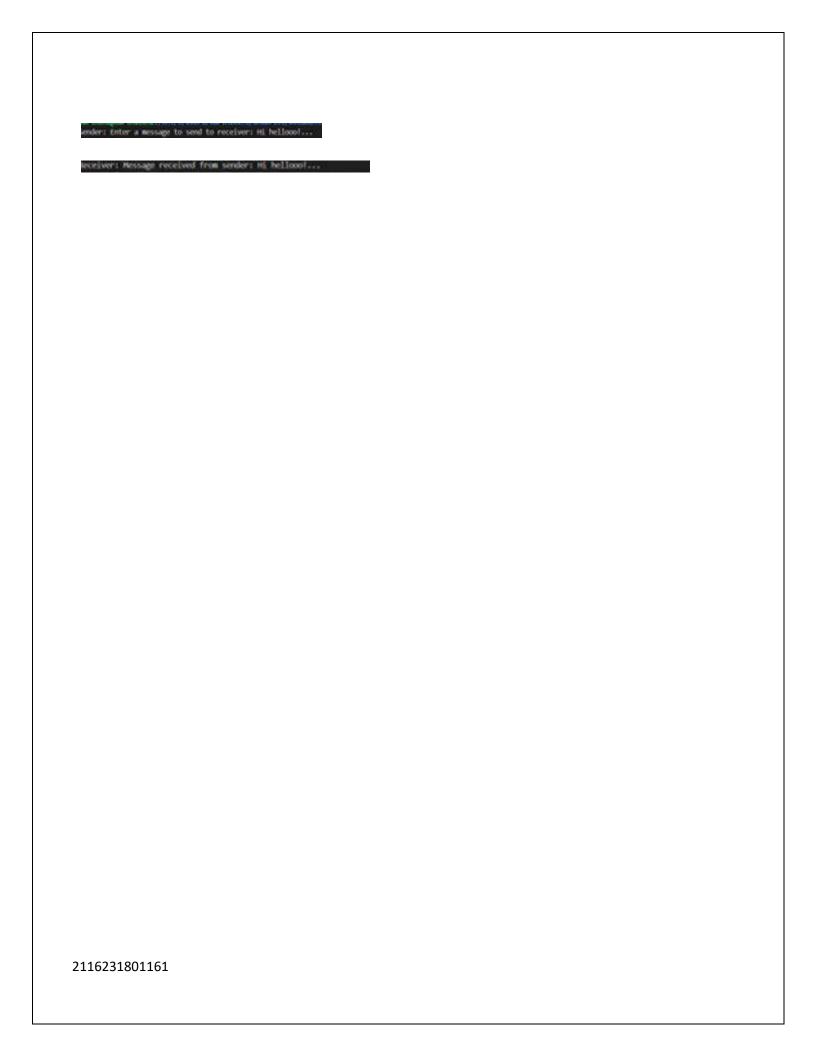

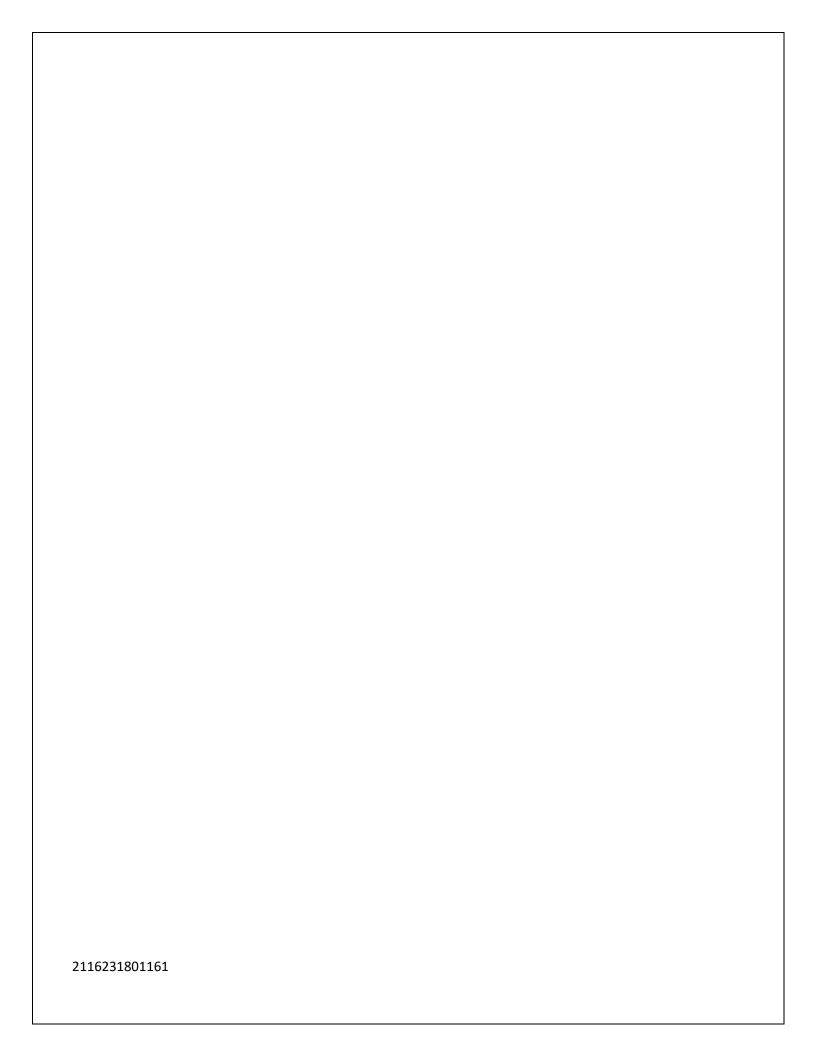

2116231801161

RECEIVER

2116231801161

```c
int main() {
key_t key = ftok("sender.c", 65); int shmid;
SharedMemory *shm;
shmid = shmget(key, sizeof(SharedMemory), 0666 | IPC_CREAT); if (shmid == -1) {
perror("shmget failed"); exit(1);
}

shm = (SharedMemory *)shmat(shmid, NULL, 0); if (shm == (SharedMemory *)-1) {
perror("shmat failed"); exit(1);
}

while (shm->ready == 0) { sleep(1);
}
printf("Receiver: Message received from sender: %s\n", shm->message); if (shmdt(shm) == -1) {
perror("shmdt failed");
exit(1);
}
if (shmctl(shmid, IPC_RMID, NULL) == -1) { perror("shmctl failed");
exit(1);
}

return 0;
}
```

OUTPUT:

2116231801161

```
sender: Enter a message to send to receiver: Hi helloool...

receiver: Message received from sender: Hi helloool...
```

2116231801161

2116231801161

RESULT:

The IPC Program with Shared Memory is Successfully Implemented.
